

Technical Data Sheet

Application

Zeta 20 is the digital Insulation and continuity Tester is suitable for following

- Measurement of the insulation resistance on electrically dead equipment and systems with test voltage up to 1000V.
- For testing motors, transformers, generators, switchgears.
- For testing of house hold application.
- Measurement of the insulation resistance of cables.
- Very useful for on-site maintenance and service departments.

Product Features

| Analog + Digital | The Analog scale for insulation resistance | | | |
|--------------------------------------|---|--|--|--|
| Display: | measurement is logarithmic in nature which | | | |
| (Log Scale For | gives the dynamic performance of an analog | | | |
| Insulation | insulation tester. The Analog scale is linear for | | | |
| Measurement) | low ohm and voltage measurement. | | | |
| User selectable | The instrument is provided with user | | | |
| backlit display | selectable for taking measurements in dark | | | |
| | areas/poor lighting conditions | | | |
| Connector jack | The instrument can be operated from mains | | | |
| for external | supply (230 V AC) instead of batteries using | | | |
| mains adapter | external mains adapter (230 V AC/9 V) DC, | | | |
| (optional) | 500 mA (4.5 VA) (isolated) | | | |
| Rechargeable | The instrument can be provided with inbuilt | | | |
| (optional) | circuit to recharge rechargeable battery of 1.5 | | | |
| | V AA size | | | |
| Test voltages | The voltages from 50 V to 100 V can be | | | |
| 50 V/100 V/250 | selected for insulation resistance measurement. | | | |
| V/500 V/1000 V | It covers all insulation tests up to 1000 V | | | |
| Insulation | The instrument is capable of measuring | | | |
| resistance | insulation resistance from $10 \text{ k}\Omega$ $2G\Omega$ | | | |
| measurement | | | | |
| Low resistance | Low resistances can be measured up to 99.9 Ω . | | | |
| measurement | There are two measuring ranges for | | | |
| (0.01 Ω99.9Ω) | Low Ω: 9.99Ω & 99.9Ω | | | |
| Hands free | Continuity testing (0-10 Ω with acoustic signal) | | | |
| continuity | can be done without pressing test button. | | | |
| testing | In addition to the display function, an acoustic | | | |
| | signal can be activated which sounds if the | | | |
| | adjustable limit value is violated | | | |
| Voltmeter | Instrument measures voltages | | | |
| | > 25 V600 V AC/DC | | | |
| Low battery | Automatic display of the symbol "++" | | | |
| indication | when battery cells are exchausted | | | |
| Stop watch | This function allows you to measure elapsed time up to one hour | | | |
| Protective holster for rough duty | A holster of soft rubber with tilt stand protects the meter against damage in case of shocks and drop | | | |

| Automatic | Capacitive devices under test , such as cables | | | |
|-------------------------------|--|--|--|--|
| discharge for | and windings ,that get charged during the | | | |
| capacitive | test, are discharged by the tester | | | |
| circuits after test | | | | |
| measurement | | | | |
| Live circuit | Displays presence of voltages > 25 V | | | |
| detection | irrespective of function selected | | | |
| Blown fuse | The display FUSE points to a blown fuse | | | |
| indication | | | | |
| Pre-selectable | In normal course, the insulation test | | | |
| measurement | terminates and the measured insulation | | | |
| time for | resistance value remains on the display for | | | |
| insulation | 2 sec after the test key is released. With the | | | |
| resistance | 5 | | | |
| measurement Pre-selectable | | | | |
| | feature, the insulation test continues and the | | | |
| measurement | measured value remains on the display for | | | |
| time | the pre-determined time. Pre-selectable | | | |
| | time: 10 sec-5 min | | | |
| Pre-selectable | An acoustic signal can be generated when | | | |
| time checks | measured value of insulation resistance falls | | | |
| (GO/NO-GO | below an adjustable limit value | | | |
| option) for | | | | |
| ΜΩ/GΩ | | | | |
| Lead resistance | The instrument provides a facility to | | | |
| null value | compensate the resistance of the leads for | | | |
| | accurate measurement of low resistances | | | |
| Storage of | In addition to the display of actual measured | | | |
| MIN/MAX | value, the minimum or maximum value can | | | |
| values: | constantly be updated or stored | | | |
| Storage memory | The instrument provides a facility to store and | | | |
| for last 10 | recall 10 values in each of 5 ranges of | | | |
| readings | insulation resistance measurement, continuity | | | |
| | and resistance measurement | | | |
| Auto power | The instrument turns off automatically, if any | | | |
| OFF function | of the keys or the selector switch have not been activated for about 10 min in insulation | | | |
| | range and 5 min in other ranges or can be | | | |
| | switched to continuous operation | | | |

Zeta 20

Technical Specifications

| Meas.Function | Range | Resolution | Accuracy ± (% of rdg ±Digit) | Overload value | |

| VAC/DC | 25V to 450 V | 1V | + 2% + 3D | 1200 Vrms 10 sec | |
| | 450V to 600V | 1V | + 3% | | |

1) For Insulation Resistance Range:

- Terminal voltage on open circuit (DC)- 0% + ٠ 30% of rated voltage
- Short circuit current < 2mA •
- Test current on load 1 mA at minimum pass • values of insulation as specified in VDE 0413 Part1.

2) For Low Ohms/Continuity Ranges:

- Open Circuit Voltage 5V + 1V D.C. Lead Resistance Compensation: 0-9.99W. •

Power Supply

| Battery | 6 x 1.5 V cells IEC L R6 non- rechargeable cells(Rechargeable Alkaline Manganese cells provided in |
