

Technical Data Sheet

Zeta 30

Zeta 30 is Analog Digital Multimeter with insulation resistance measurement , which measures VAC, VDC, VAC+DC, Frequency, mA DC, mA AC+DC, Resistance, continuity, Diode, Farad, AC current measurement with clip-on sensor and insulation resistance measurement.

Special Features

- Insulation resistance measurement up to 3G ohm
- RMS value with distorted wave from
- Auto and manual ranging modes
- Data hold function
- Display with Backlit

Application

Zeta 30 is Analog Digital Multimeter with insulation resistance measurement, which measures VAC, VDC, VAC+DC, Frequency, mA DC, mA AC+DC, Resistance, continuity, Diode, Farad, AC current measurement with clip-on sensor and insulation resistance measurement.

Product Features

Insulation resistance measurement up to 3GΩ	Insulation resistance measurement up to 3GΩ with Test voltages selection: 50 V, 100V, 250V, 500V and 1000V.	Applicable International Safety standards	1000 V CAT II/600V CAT III as per International Safety standard IEC 61010-1- 2001 and IEC 61557.
Route mean square value with distorted wave form.	Measuring principal employed permits the measurement of route mean square value (TRMS) OF AC quantities and mixed quantities (AC and DC) regardless of wave form.	Signaling in the case of a blown fuse.	The display shows "FUSE" in case of blown fuse.
AC Current measurement with clip-on sensor	Current measurement up to 300A with clip-on sensor having ratio 1mv/10mA.	Automatic blocking socket (ABS)	The automatic terminal blocking system prevents incorrect connection of test lead and incorrect selection of measurement quantity, which provide safety to the user.
Min/Max Function	By pressing min/max button instrument will start recording minimum and maximum readings.	Interface and software RISH com 100.	The multimeters are fitted with a serial RS-232 C interface via which the measured values can be transmitted to a PC. These values, electrically isolated, are transmitted to the attachable interface adaptor with infrared light through the case.
Temperature measurement	Temperatures from -200 to 800°C using pt100 and pt 1000 sensors.	Analog Scale	Analog scale that updates at the rate 20 times /sec to observe fluctuations in input.
Auto Power Off	In order to save the power of the Batteries, the meter will automatically shut OFF if it detects no activity for 10 minutes.	Continuous On Mode	In this mode, AUTO POWER OFF is disabled.
Continuity test	This permits testing for short circuit and open circuit. In addition to the display, a facility of sound signal is available.	DATA Hold Function	By pressing DATA HOLD button, reading on the display can be latched for Hands free operation.
AUTO and MANUAL ranging modes	In AUTO ranging mode the instrument automatically selects the range with best resolution depending on the applied input. In MANUAL ranging mode range is user selectable using MAN key.	NULL ZERO Correction for Resistance	For Low ohm measurement, the lead resistance can be compensated by pressing the shift key (Yellow Key)
Indication of negative values on the analog scale	When measuring DC quantities, also negative values are shown on the analog scale so that variations of the measured value can be observed at the Zero point.	NULL ZERO Correction for Capacitance	Null zero connection for capacitance. For nF range, stray capacitance can be compensated by shift key (Yellow Key)
Protection from dust and water	Instrument: IP50 For terminals : IP20 as per IEC60529	Diode Measurement	For testing diode and transistors, diode measurement function is available.
		Display with Backlit.	For clear visibility in dark conditions, Zeta 30 is featured with backlit.

Technical Specifications

Reference conditions for Accuracy

Reference temperature	23°C ± 2K
Relative Humidity	45%...55% RH
Waveform of measured quantity	Sinusoidal
Input frequency	50 or 60 Hz ±2%
Battery Voltage	8 V ± 0.1 V

Environmental

Operating temperature	-20 to +50°C
Storage temperature	-25 to +70°C
Relative humidity	<75% non condensing.
Terminal Protection	IP20 for terminals
Altitude	Up to 2000 m

Interface

Type	RS232C, serial, as per DIN 19241.
Data transmission	Optically with infrared light through the case.
Baud rate	8192 bits/s.

Battery

Battery Voltage	6 x 1.5 V Cells
Battery type	Alkaline manganese Dioxide cell as per IEC LR 03 , ANSI 24A (Size AAA)
Battery Life	Minimum 600 hours on Vdc, Adc, 240 hours on Vac, Aac, For MΩISO @1000 V, 800 Measurements possible with nominal current MΩISO @500,250V, 100V, 50 V, 2400 Measurements possible with nominal current.

Response time (After manual range selection)

Measured Quantity/ Measured Response time	Response Time		Transient response for step function of the measured quantity
	Of Analog indication	Of digital indication	
VDC,VAC,A AC+DC,A AC	0.7 s	1.5 s	From 0 to 80 % of upper range limit.
30Ω...3 MΩ	1.5 s	2 s	From ∞ to 50 % of upper range limit.
30 MΩ	4 s	5 s	
	0.7s	1.5s	
nF,µF,°C,		Max. 1... 3 s	From 0 to 80 % of upper range limit.
300 Hz,3KHz		Max 2 s	
30 KHz,300 KHz		Max 0.7 s	
% (1 Hz)		Max 9 s	
% (≥10 Hz)		Max 2.5 s

- 1) At 0° + 40 °C
- 2) With zero adjustment, without zero adjustment + 50 digits
- 3) Range
 - 3 V ac/dc: U_e = 1.5 V eff/rms ... 100 V eff/rms
 - 30 V ac/dc: U_e = 15 V eff/rms ... 300 V eff/rms
 - 300 V ac/dc: U_e = 150 V eff/rms ... 1000 V eff/rms
- 4) On the range 3 V dc, square - wave signal positive on one side 5 ... 15 V,
f = const., not 163.84 Hz or integral multiple.
- 5) Without sensor.
- 6) Measurement with clip-on current sensor with ratio 1mv/10mA.
- 7) Discharge the DUT through 1M Ω resistance, before insulation resistance measurement. LCD displays value of voltage present on DUT.
- 8) In this switch position live circuit detection (V AD+DC) is done before insulation measurement. If voltage present is greater than 50V (AC+DC), insulation resistance measurement function is disabled and LCD displays value of voltage present on DUT.
