THETA PI-101
Programmable Dual output DC Isolator

Application

The purpose of the Sifam Tinsley PI-101 is to electrically isolate input, output and power supply. The isolator fulfills all requirements and regulation concerning electromagnetic compatibility EMC and safety(IEC61326-1 and IEC 61010-1:2010). The device has one input and provides one independent output in an extremely small space.

Product Features

Electric Isolation

1) One electrically isolated analog output prevent interference voltage and current. Solves grounding problem in meshed signal networks.
2) High electric isolation between input and output - 2.3 kV, and power supply versus all other circuits - 3.0 kV.

Function

Simple de isolator serves to electrically isolate programmable input de signal to programmable de output signal.
